

May 21st, 2019

Dear Sir or Madam,

I am writing you in my capacity as Electrical Works Manager for ENERCON GmbH UK Ltd., appointed for developing wind farm projects on the United Kingdom market on behalf of ENERCON GmbH, to recommend the professional services of **Josef Schnell GmbH**.

We have had the pleasure of working with **Josef Schnell GmbH** on several projects over the past three years, having only positive dealings with them during this time.

Josef Schnell GmbH is a highly qualified and respected electrical contractor within the industry, showing professionalism, promptitude and honesty in all their business relationships. They are providing state-of-the-art technology for installing wind farm cabling infrastructure, thus minimizing installation time and costs to unrivalled levels. They had the electrical balance of plant contractor role on some very challenging EPC projects we delivered, where they built the cable infrastructure (wind farm medium-voltage and low-voltage cables, fiber-optic network and auxiliaries) and offered their professional management services for the main contractor role.

They meet and exceed the highest standards for health, safety, environmental and quality in all their work. They have the technical knowledge, the experience and a pro-active approach on resolving inherent issues/matters arising during the projects implementation, thus accomplishing all their milestones properly and on time.

I would highly recommend without any hesitation **Josef Schnell GmbH** as a reliable contractor and an excellent choice for building successful projects. For any other details you wish to discuss, please don't hesitate to contact me.

Yours sincerely,

Sorin Stoica
